ELECTRICAL ENGINEERING SERVICES

PARS CONSULTING ENGINEERS, INC.

Founded in 1995 by Dr. Rafie Hamidpour, Pars Consulting Engineers, Inc. solves clients' problems responsively, cost effectively, and at a reasonable cost, with particular attention to professional ethics.

UNINTERRUPTIBLE POWER SUPPLY (UPS), SINGLE AND THREE PHASES

Pars Consulting designs, purchases, installs, and provides maintenance for small, medium, and large-scale (>50 kVA) battery-free uninterruptible power supply (UPS) systems. The company's solution is compatible with several world leading brands of UPS systems. Pars Consulting Engineers, Inc. currently provides the lowest maintenance and highest uptime availability of any UPS energy storage product on the market.

ELECTRICAL ENGINEERING

- Lighting: Low voltage, neon, line voltage, theme, fiber optic, signage, airport, and airport signage
- Power: Medium voltage, primary and secondary distribution, generation, substation, co-generation, supervisory control and data acquisition system (SCADA), emergency, standard, and airport electrical vault (SCADA),
- Special Systems: Robotics and factory automation, energy and facilities management data system, grounding, and product development
